

PB-7 - adjustable from 365 to 485mm

Adjustable height

Adjustable height from 365 to 485mm uninterrupted.
With addition of a 0 to 5% BC-PH5 slope corrector, adjustable from 377 to 497mm.

Composition

Pedestal PB-4 + 2x sleeve C1-PB4.

Material

Copolymer polypropylene (CPP), material thickness 3 to 4.5mm
Composition: 80% recycled PPC, 20% talc + UV black masterbatch and 100% recyclable.

Dimensions of the PB-7 pedestal

Head = diameter 170mm – Installation surface 227cm²
Base = diameter 197mm – Ground surface 305cm²
Sleeve = diameter 131mm – Height 143.5mm (Qty = 2x)

Performances

Resisting UV light, weather, sea salt and almost all chemicals
Temperature range: -30° to + 90°

Applications

Support for outdoor terraces with any kind of materials: timber decking, stone, ceramic, composite materials, metal, fiberglass grid...Can be placed on any stable substrate, also over insulation panels.

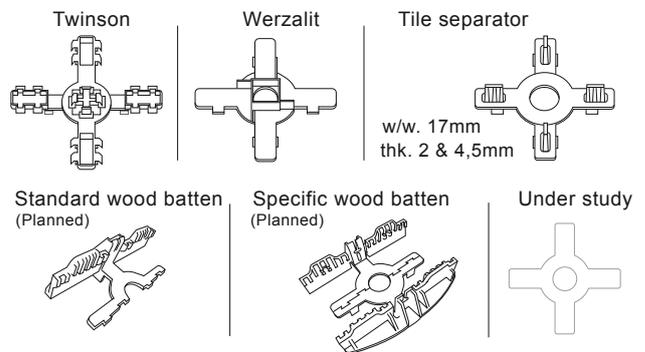

Slope corrector BC-PH-5 from 0 to 5%

Slope corrector BC-PH5 is placed under the base of pedestal PB-7. Consisting of 2 cylindrical parts, it allows to compensate for 1 to 5% slopes by simply rotating the devices. Thickness of BC-PH-5 = + 12 mm to be added to the adjustable height of pedestal PB-7.

Accessories

Different BUZON accessories can be clipped to the head of pedestal PB-7 according to the materials used by manufacturers of terraces, podiums and temporary exhibitions (pedestals, gratings, tiles, etc.) and other parts for specific applications demanded by manufacturers.

Compression test (1daN = 1Kg/f = 2,23lbf)

Performed on the full (1/1), half (1/2) or quarter (1/4) surface of the head.

Position	Height(mm)	Breaking Load(daN)	Breaking Load(lbf)
1/1	485	972	2167
1/2	485	870	1940
1/4	485	633	1412

Safety value for maximum allowable load by compression for PB-7:
• Safety for pedestrian terraces: divide the load indicated in the table by 2 with a safety factor of - 15 %.
• Safety for technical floors: divide the load indicated in the table by 4 with a safety factor of - 15 %.
Note : The BUZON PB-7 pedestals in polypropylene are not designed to support machinery or equipment subject to vibration
